Demand Planning Optimisation with Machine Learning & Artificial Intelligence

Australasian Supply Chain Institute brings Melbourne members a unique opportunity to canvas The Future of Supply Chain Report which shows a wave of disruptive change flowing through the supply chain industry. Data is the new currency of supply chains and people who can understand and manage data will be increasingly in demand.

We'll hear from engaging presenters on the reality and the hype of Machine Learning and Artificial Intelligence, its applications and benefits in Demand Planning and how culture and this new technology intersect. There will be a technology demonstration following the presentations.

Carter McNabb, Partner, GRA Supply Chain Pty Ltd

Carter has over 25 years of international supply chain advisory and transformation experience and is a founding Partner of GRA Supply Chain Pty Ltd.

Luke Tomkin, Partner, GRA Supply Chain Pty Ltd

Luke has 20 years experience working in South East Asia and Australasia deliver rapid and sustained inventory reductions, service level improvements and supply chain cost reductions through the practical application of leading supply chain processes, techniques and systems. Luke has published articles in periodicals; run workshops; lectured for Monash University's Supply Chain Master's Program.

John Whitehead, Director, Six Degrees

John leads the consulting group in Victoria with specialist teams covering Supply Chain & Procurement, Engineering and Operations, Sales Marketing & Retail, Digital NFP & Education with 40+ exceptional consultants. The Future of Supply Chain Report developed by Six Degrees is a glimpse into future technology and capability. John will present the findings.
